Getting started

1 Connect to your TV.

Follow the steps 1 to 4 below to connect your PlayStation® 4 system to your TV.

AC IN connector

HDMI OUT port

HDMI input port

AC power cord

HDMI cable

To an electricity supply

Using a PlayStation® Camera? Find out how to set it up in its instruction manual.
2 Connect to a LAN cable (sold separately).

No Wi-Fi connection? You can use a LAN cable to connect your PS4™ system to the Internet instead. To connect your PS4™ system to the Internet via Wi-Fi, do not connect a LAN cable.

We recommend connecting your PS4™ system to the Internet to get the most out of it.
3 Turn on your TV, and then change the TV channel to HDMI™.

4 Turn on your PS4™ system by touching the (power) button.

The power indicator will blink : blue, before turning white.

---

If you can’t get a picture when the PS4™ system is turned on (the power indicator will turn white), simply touch the (power) button for at least 7 seconds (until the system beeps twice) to turn off the power, and then turn on the power again.
Connect your DUALSHOCK®4 wireless controller to your PS4™ system using the USB cable, and then press the (PS) button. The controller will be registered (paired), and turn on.

- You’ll need to register the controller in some situations, such as when you use the controller for the first time, or when you use the controller on another PS4™ system.
- Once you’ve registered the controller, you can disconnect the USB cable and use the controller wirelessly.
6 Select your settings.

Set up an Internet connection, set the date and time, and adjust other settings. Follow the on-screen instructions to adjust various settings, and then select [Start Now] from the set-up completion screen. Once you have set up an Internet connection, a system software update will be downloaded automatically - as will future system software updates.

Will a child be using your PS4™ system? If so, be sure to read “Setting the parental control” section.

You can change any settings that you previously skipped via (Settings) in the function screen.
Setting the parental control

Some PS4™ content may not be suitable for your child. Most PS4™ content is rated by an independent ratings body.

To ensure your child only has access to suitably rated content, just set the correct parental control before you first let your child play. You can set the parental controls in (Settings) in the function screen > [Parental Controls] > [Restrict Use of PS4 Features] > [Application]. Use the tables below for guidance on how the Parental Control Setting relates to different age groups.

You can restrict access to Blu-ray Disc™ and DVD video content, and to the Internet Browser, from (Settings) in the function screen > [Parental Controls] > [Restrict Use of PS4 Features]. Restricting access to the Internet Browser will not prevent launch of some applications that use the Internet.

Regardless of the Parental Control Settings, you should monitor your child’s activity on the PS4™ system. You can override the Parental Control Settings at any time to allow an older child or adult to play.

**Go to (PlayStation®Store)**

Now that you’ve got a PS4™ system, it’s time to head over to see what’s available at PlayStation®Store.

PlayStation®Store has a wide variety of downloadable content, some of which you can’t get anywhere else. You’ll find games to suit every taste, as well as game add-ons that make your games even more fun to play, plus free demos and much, much more. And you can even begin playing your games before they’ve finished downloading.

To use PlayStation®Store, you must have a Sony Entertainment Network (SEN) account and an Internet connection. PlayStation®Store and SEN subject to terms and country and language restrictions, see eu.playstation.com/legal for details.

Users are responsible for internet service fees. Users must be 7 years or older and users under 18 require parental consent. Additional age restrictions may apply. Charges apply for some content and/or services.

**Sharing your gaming experience**

When using some of the PS4™ system’s online services, you can upload screenshots and video clips of gameplay from a game, and broadcast (stream) your gameplay.

To use these features, you must have an SEN master account and an Internet connection.

**Using a mono headset**

Connect the mono headset to your controller for in-game voice chat.

Creating an SEN account

Create an SEN account to use PSN℠ and SEN services such as PlayStation®Store and Music Unlimited*.
* Not available in all countries.

- You can create your own SEN account for free.
- You must have an Internet connection to use services. You must also update the system software to the latest version.
- A maximum of 16 accounts can be registered on each PS4™ system.
- To create a sub account for users under a certain age, you must first create a master account for a parent or guardian.
- Accounts created on a PlayStation®3 system, a PlayStation®Vita system, or a computer can be used on the PS4™ system.

If you do not have an SEN account
Select 🌐 (Settings) > [PSN℠] > [Sign In to PSN] from the function screen, and then follow the screens to create an account.

If you already have an SEN account
Select 🌐 (Settings) > [PSN℠] > [Sign In to PSN] from the function screen, enter your sign-in ID and password, and then select [Sign In].
Using the controller

Charging
To use your controller wirelessly, you must first charge its battery. Press and hold the (PS) button and the controller’s battery charge level will be shown on-screen.

1 Turn on your PS4™ system (the power indicator will light up white), or set it to standby mode (the power indicator will light up orange).

2 Connect your controller to your PS4™ system with the USB cable.

To charge your controller when in standby mode, you must first checkmark the [Supply Power from USB Ports] option in (Settings) > [Power Saving Settings] > [Set Functions Available in Standby Mode].
Using multiple controllers

You can use up to 4 controllers at the same time. When you press the \( \text{X} \) (PS) button on a controller for which registration has been completed, a colour will be assigned to that user and the light bar will light up in their own colour, depending on the order in which they join in. The first user is blue, the second is red, the third is green and the fourth is pink.
Caution
If you disconnect the AC power cord while the power indicator is lit or blinking, data might be lost or corrupted, or the system might become damaged. You must disconnect the AC power cord only once the power is turned off completely. Be sure to read the "Turning off the power completely" section below.

Entering standby mode
You can charge the controller from a USB port and remain signed in to PSN while in standby mode. Select (Power) from the function screen, and then select [Enter Standby Mode]. The picture will disappear, and the power indicator will blink white, before turning orange. To exit standby mode, press the (PS) button.

Turning off the power completely
Select (Power) from the function screen, and then select [Turn Off PS4]. The picture will disappear, and the power indicator will blink white, before turning off.
