PlayStation®Vita

Protective film Instruction Manual

PCH-ZPF1

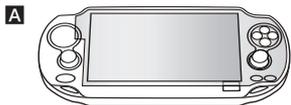

Compatible hardware: PlayStation Vita system

Carefully read the information on this package together with the instructions for your hardware before using this product.

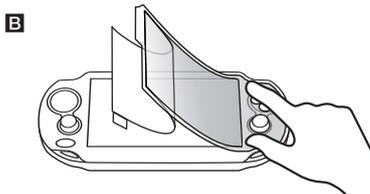

Use and handling

- For use only with the PS Vita system.
- Hard coating to resist scratches and fingerprints.
- High transparency to retain the high-definition image quality of the PS Vita system.
- Openings for the PS Vita system buttons to make it easy to attach the film in the appropriate position.

Usage instructions

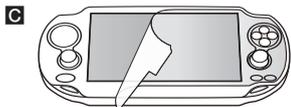

1. Wipe the screen (touchscreen) of the PS Vita system with a soft cloth to remove dirt and dust.

2. Place the film on the PS Vita system with the holes in the protective film over the buttons and the right stick, aligning the top of the film with the top edge of the PS Vita system (Figure A).

3. While holding down the right edge of the film, peel off the sheet with the white tab, and then cover the screen with the film (Figure B).

4. Peel off the top sheet (Figure C).

- If you see air bubbles under the film, rub the air bubbles lightly with your fingers to let them out from under the film.
- To remove the film from the screen, attach adhesive tape to the film, and then slowly peel the film off of the screen, being careful not to touch the adhesive surface of the film.
- If your PS Vita system requires servicing, remove the film from the screen before sending the system. If the film is left on the system, it might be removed and will not be returned.
- Protective film for use on the screen only. Not for use on rear touch pad.

Design and specifications are subject to change without notice.
